How to Setup Dahua Push Notifications via Mobile Application

How to Setup Push Notifications via Mobile Application

Description

For push notifications to work you must have "Event/Motion" and or "Alarm" enabled From the "Device Manager" in the main menu of IDMSS/GDMSS application. Follow the step by step instructions below to setup push notifications.

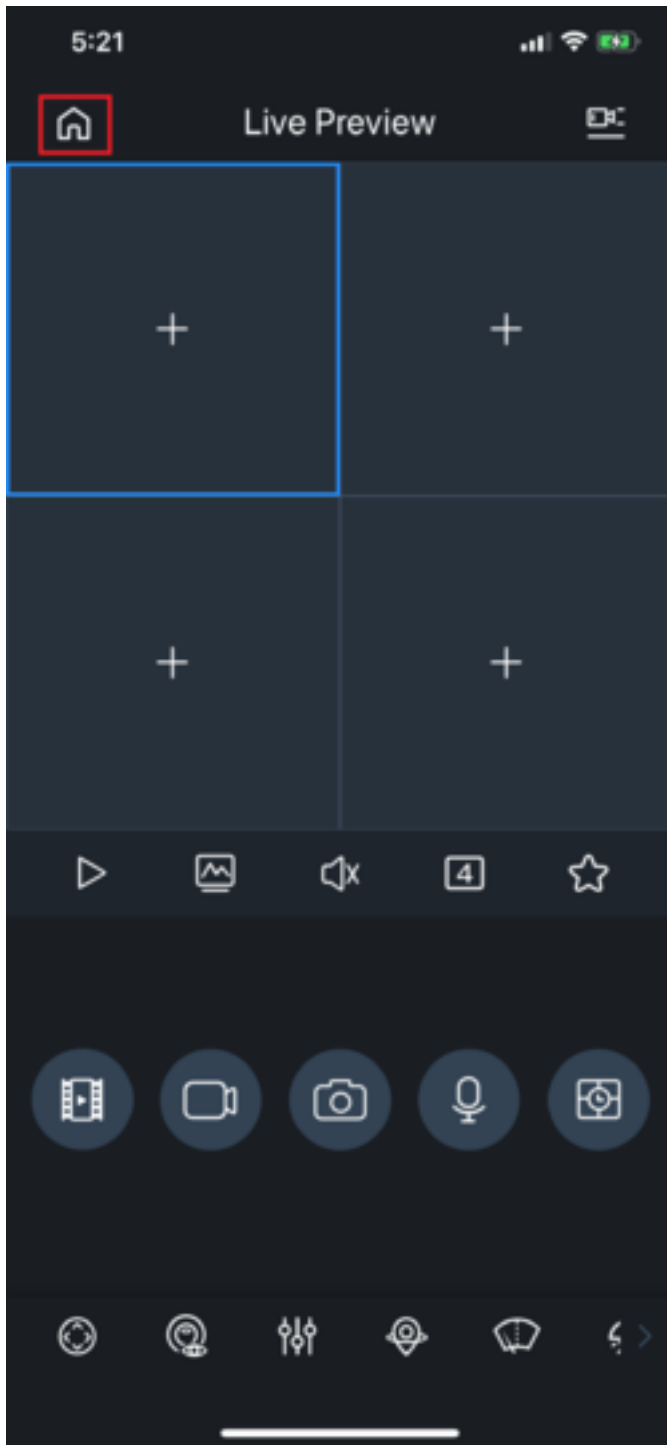

Prerequisites

- Smartphone with IDMSS/GDMSS PLUS
- Connection and profile to the device
- Event such as Motion Detect must be enabled from Recorder.

Step by Step Instructions iDMSS/gDMSS version 4.50.000

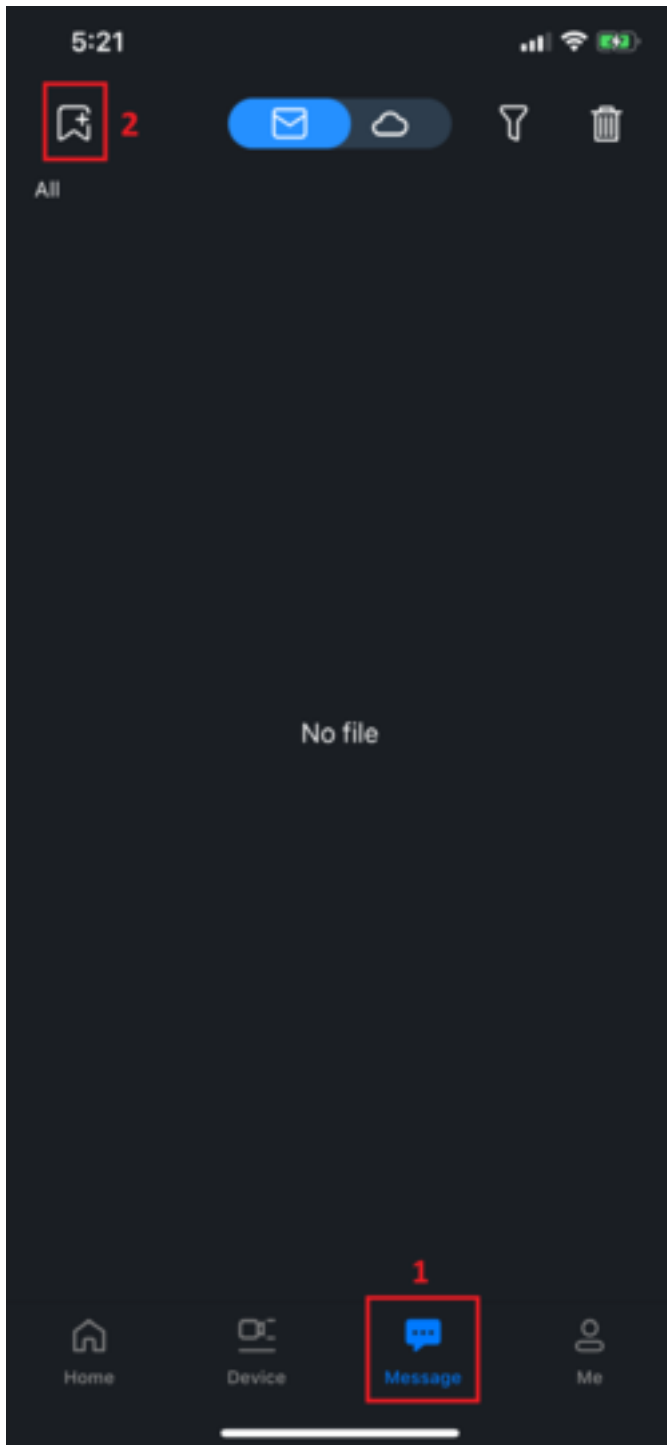

1. Open iDMSS/gDMSS on the phone, and select the home icon located on the top left corner.

Remote Access/ Mobile Access

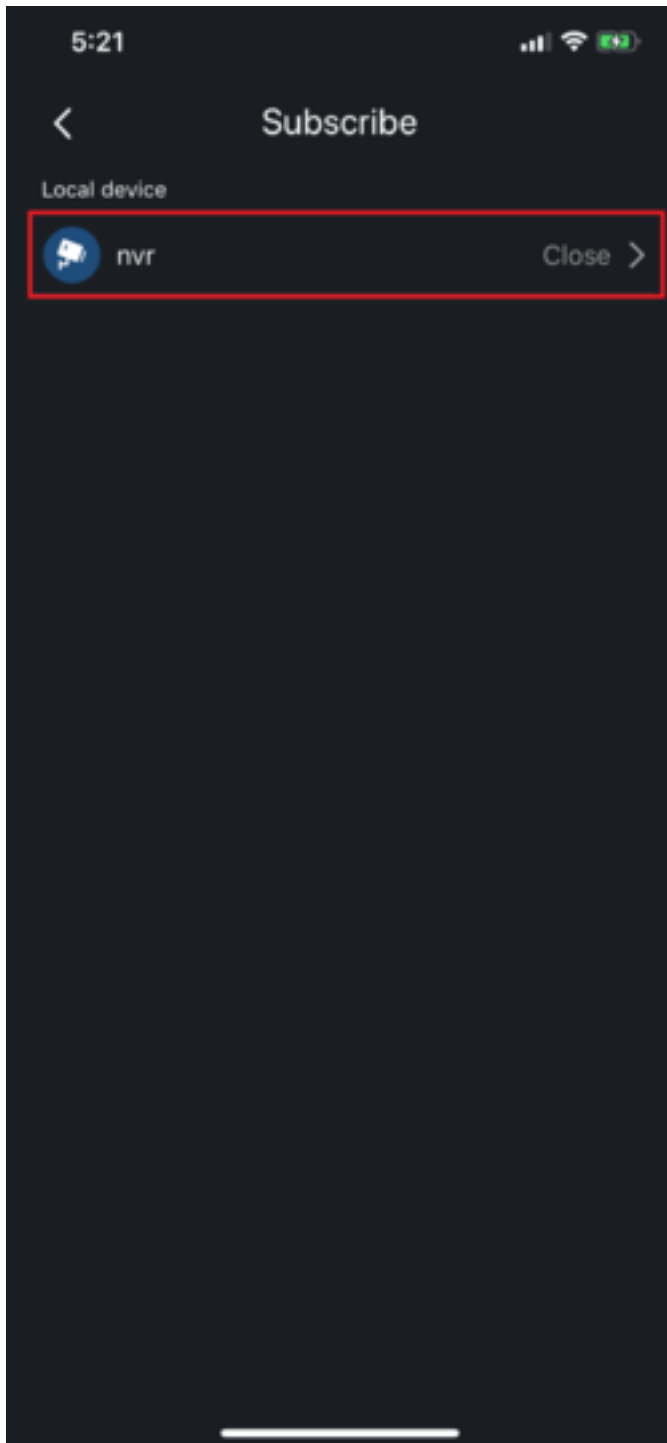

2. Select the "Message" icon towards the bottom then select the create alert icon towards the top left corner.

Remote Access/ Mobile Access

3. Select the recorder/camera previously added.

Remote Access/ Mobile Access

4. Toggle the recorder/camera to enable push notification for that device. As for "Push type", there are options and depends on which is used the alert will be displayed as is.

Remote Access/ Mobile Access

5. In this tutorial, let's take a look at "Motion Dection". Select the "Motion Dection".

Remote Access/ Mobile Access

6. Select which channels the motions are setup, and go back.

Remote Access/ Mobile Access

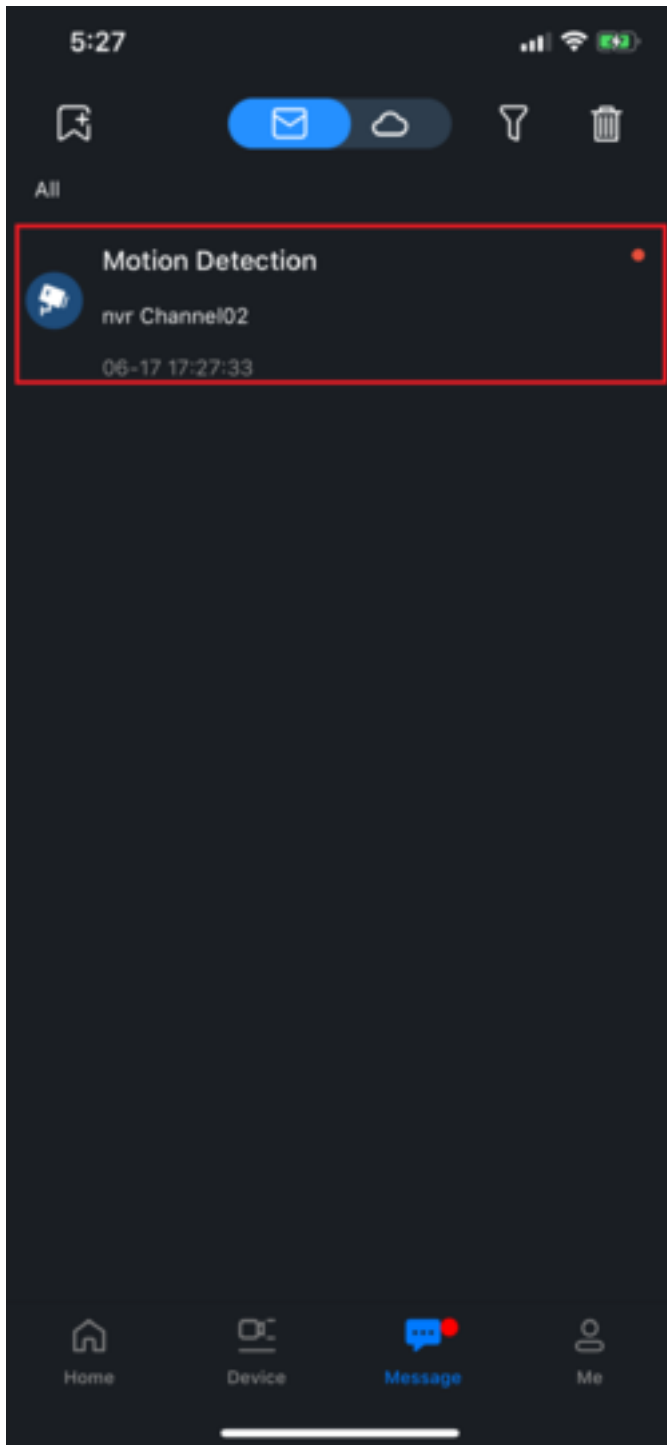

7. Click on the save icon located on the top right corner to save the changes.

Remote Access/ Mobile Access

8. When the motion is being triggered, the push notification message will be displayed.
