

Remote Access/ Mobile Access

How to Setup Push Notification Schedule for dahua devices?

Description

This guide will show how to setup the Push Notification Schedule in the gDMSS / iDMSS app.

This allows the app to only send Push Notifications for events during a desired time period.

Prerequisites

- gDMSS / iDMSS app installed
- Dahua devices (NVR/IPC/etc) added to app
- Dahua device configured with active rule for notification (for example motion, IVS, system event, etc)
- Dahua Account
- Devices added to Dahua Account

Step by Step Instructions

Push Notification Schedule will only be an option when logged into an active Dahua cloud account in the mobile app

Remote Access/ Mobile Access

2. Select 'Log in Now'

Remote Access/ Mobile Access

3. Enter the Username and Password for the account then select 'Log in'

You can select 'Register' in the top right to create a new account

Remote Access/ Mobile Access

4. Once logged in, under the 'Me' section select 'General'

Remote Access/ Mobile Access

5. There will now be a section in General settings for Notification schedule setup

Remote Access/ Mobile Access

6. Select the field labeled 'Period' to enter a time range

Remote Access/ Mobile Access

7. Use the interface to enter a time range

Select the check mark to save

Remote Access/ Mobile Access

8. The 'Period' field should be updated to the time range that was just set

Remote Access/ Mobile Access

9. Select the arrow in the top left to back out of the menu
